Abstracts

Subject Index (Cross-Indexed)

PAGE

A

Absorption: Effect of Protective Coatings on the —of Moisture by Gelatin-Latex Gas-cell Fabrics 48
of Caustic Soda by Cellulose 491
of Dyestuffs by Cellulose. VI 529
by Viscose 251
of Substantive Dyestuffs 178
of Tannin by Cellulose Acetate Rayon 139
Acetate Cotton Unions: Dyeing—with Special Reference to Mercerized Fabrics 531
Fibres: Wool-like 524
New Sizing Material for—and Other Synthetic Warp Yarns 493
Rayon and Acetate Silk Crêpes: Boil-off, Dyeing and Finishing of 252
Effect of Light on 301
Partially Substantivized 532
Production of Many-colored Effects in Mixed Goods Containing 178
Warps: Sizes for 250
Silk: Developments in Printing 226
Yarns: Physical Properties of Rayon and—in Relationship to Some Textile Manipulations 250
Acid Character: Precipitating Agent for Dyes of —in Dye Analysis 307
Dyes: Principles of Dyeing with 252
Theory of Wool Dyeing with Particular Reference to—in Colloidal Solutions 497
Group: Calculation of the Concentration and Dissociation Constant of Each 535
Number: Rayon 343
Acoustical Properties of Textiles 176
Activated Carbon: Treatment of Trade Waste with 496
Adsorption of Caustic Soda by Cellulose 246
of Organic Liquids by Cellulose Products ... 246
Theory 255
Adulteration: Methods of Analysis of (Olive) Oils with a View to Detection of 255
Aeolotropic Liquids: Influence of Electric Field on Viscosity of 259
After-treatment of Rayon Crêpe Prints, Drying . 416
Aging Test: Accelerated—for Weighted Silk 224
Air-brush Spraying: Printing of Cloths by 345
Air Permeability: Effect of Tin Weighting on the—of Silk 493
Measurement of the—of Fabrics 347
Albumin: Fixing with—in Printing 226
Albuminous Products: Production of Rayon from 450
Alcohol-water Mixtures: Hydration in—of Starch and Gelatin 421
Aliphatic Organic Chemicals in Textile Processing 251
Alkali Celluloses: X-ray Spectrography of 525
Degradation of Wool Protein: Mechanism of Sulfur Lability in the 529
Reaction of Starch with 495
Use of Methyl Green for Detecting Traces of—in Fibrous Materials 422

PAGE

Alkaline Boiling: Supression of—in the Bleaching and Dyeing of Vegetable Fabrics 530
Solution: Decomposition of Hydrogen Peroxide in—and Its Importance for the Bleaching of Cotton 178
Solutions: Dissolution of Chemically Modified Cotton Cellulose in 449
Alkalis and Wool 246
Allwörden's Reactions: Causes 299
Aluminum (Vessels) in Bleaching Processes with Hydrogen Peroxide 304
Aminoazo Dyes: Fastness of Certain—to Washing 180
Amorphous Rubber: X-ray Study of 539
Amylase: Preparation for—Determinations of Starch Substrates 182
Amylose: Molecular Size 495
Analysis: Precision in the—of Dyes 532
Analytical Methods: Review of Recent—with Special Applications to Textile Analysis 304
Anatomy of the Cotton Fibre 498
Animal Albuminous Substances: Rayon from Silk Fibroin and Other 392
Fibres: Theory of Dyeing 455
Flesh: Mechanical Production of Artificial Fibres from—or Hides 523
Anthrax is Preventable 246
Antimony Electrodes for pH Measurements 182
Antiseptic: Technique of Rendering Fabrics Actively 176
Apparatus for Determination of Unsaponifiable Components of Fats, Oils, Waxes and Fatty Compositions of all Kinds 51
for Measuring the Strength-elongation Properties of Yarns and Fibre 422
New—for Evaluation of Waterproofed Textiles 458
Young's Modulus Determination 426
Arsenic Problem 495
Artificial Cellulose Fibres: Swelling and Mechanical Properties of Natural and 45
Fibres: Mechanical Production of—from Animal Flesh or Hides 523
Resins and Celluloses: Tensile Strength; Influence of van der Waal's Forces 498
Silk: Delustering of and Damage to 252
from Casein 491
Threads: Determination of Tension and Smoothness of 301
Spinning Fibres: Influence of Various Grades of—on Dyeing Property in Mixtures of These Fibres with Wool 422
Textile Fabrics: Behavior of—with Respect to Dyes 531
Velvet 416
Wool 299
Wool-like Rayon and 247
Arylamides: Use of Glucose in Dyeing with the . 180
Atmospheric Sulfur: Influence of—On Dyestuffs and Fabrics 304
Azo Dyes 305

PAGE

Analysis of—with Hyposulphite 530
Influence of Position Isomerism (Structural Differences) in—on Their Fastness to Light and Washing 530
Azoic Colors 251
in Calico Printing 454
on Cotton: Some Observations on Fastness Properties Relative to Soaping After-treatment 305
Dyeings from Dyestuff Manufacturer's Standpoint 454
Dyes and Bleaching 454
Application of—to Textiles 530
from Dyestuff Manufacturer's Viewpoint 454
in Cotton Dyeing 495
on Silk 453
on Viscose Rayon 453

B

Bacterial Desizing Agents: Application 305
Retting of Fibre Plants in Pure Cultures .. 139
Balance: New Conditioning 255
Basic Dyes: Principles of Dyeing with 252
Bast-fibre Industry: Consumption of Raw Materials in the German 300
Plants: Methods of Determining Cellulose in 536
Benzanthrone: Vat Dyes of the—Series 395
Bibliography on Launderability of Textiles 249
on Physical Testing of Textiles 257
Binary Mixtures: Viscosity of Formula for 259
Blankets: Finishing of 456
Bleach: Development of Quick or Concentration. 305
Bleached Fabrics That Turn Yellowish, Spotty and Streaky 530
Oxycellulose in Cotton Fabrics—for Dyeing. 226
Bleaches: Combination 306
Bleaching: Aluminum (Vessels) In—Processes with Hydrogen Peroxide 304
and Azoic Dyes 454
and Boiling of Cotton by Hydrogen Peroxide for Obtaining Hydrophilic Cotton Without Boiling Under Pressure 179
and Causticizing Cotton in the Cold 251
and Dyeing of Vegetable Fabrics: Suppression of Alkaline Boiling in the 530
Baths: Volumetric Method for Distinguishing Between Active Chlorine of Hypochlorite and Cotton Chloramines in Used 538
Cotton Piece Goods with Hydrogen Peroxide 251
Dyeing and Chemical Technology of Jute .. 181
Technic and the—of Vistra Fibre 179
Heat Economy During the—of Textiles ... 344
Influence of Metals in 251
Liquors: Behavior of Rayons in Presence of 345
of Cotton: Decomposition of Hydrogen Peroxide in Alkaline Solution 178
of Rayon 305
of Vegetable Fibres: Scientific Principles ... 251
Properties of Sodium Hypochlorite 530
Process 454
Solutions: New Method of Determining Active Chlorine in 454
Technic: Recent Research and Developments 305
Boiling and Bleaching of Cotton by Hydrogen Peroxide for Obtaining Hydrophilic Cotton without Boiling Under Pressure ... 179
Caustic Soda: Action of—on Insoluble Azo Colors of the Fibre 344
Treatment to Increase Resistance of Cellulose Acetate Rayon to 531
Wetting Agents and—of Cotton 49
Boil-off, Dyeing and Finishing of Acetate Rayon and Acetate Silk Crêpes 252
Pre-soaking of Silk Flat Crepes and Other Aids to Better 253
Synthetic Yarns and Their Reaction in the . 493
Bursting and Tensile Strengths of Fabrics 256
Test on Knitted Fabrics 423

C

PAGE

"Cable Twist" Yarn: Cause of Excessive Dye Variations Encountered in Fabrics Containing 179
Calcium: Does a Correlation Exist Between the Quality of Wool and Its—and Sodium Contents? 46
-Soap-Dispersion Property of the Modern Synthetic Detergents. II 305
Soaps: Dispersing Action on—of Synthetic Detergents 51
Calculation of Concentration and Dissociation Constant of Each Acid Group in a Mixture from pH Titration Curve of the Mixture 535
of pH Values 347
Calgon: Prevention of Precipitation of Lime by Means of 533
Calgonizing: What is Meant by 530
Calico Printing: Azoic Colors in 454
Textile Assistants in 48
Camera Microscopes: Application 535
Capillary Flow and Sizing 52
Carbohydrates: Molecular Structure of 228
Carbonizing Problems 417
Carboxylic Acid Groups: Concentration and Ionizing Tendency of—in Cellulose and Other Natural Products 414
Card Wastes: Effects of Different Cylinder Speeds on—, Silver and Yarn 528
Carding: Chemical Treatment of Wool in Preparation for 417
Casein: Artificial Silk from 491
Wool 414
Cataphoresis of Particles of the Fatty Acids and Related Compounds 426
Cause of Low Mechanical Strength 426
Caustic Soda: Absorption of—by Cellulose .. 246, 491
Causticizing Cotton: Bleaching and—in Cold .. 251
Cellophane: Microscopic Observation of the Electrophoresis of Dyes, Etc., with—as Semiconductor 424
Cellular Wool: Sizing of Rayon and 421
Cellulose: Absorption of Caustic Sode by ... 246, 491
Absorption of Dyestuffs by 529
Acetate: Delustering of Rayon and 449
Molecular Weight Determination from Osmotic Pressure 526
Rayon: Absorption of Tannin by 139
Sizes: Properties and Application . 417
Sizing 302
Treatment to Increase Resistance to Boiling 531
Action of Elementary and Active Oxygen on —on Basis of Viscosity Determinations 454
and Its Fibres 300
Chemistry of 247
Concentration and Ionizing Tendency of Carboxylic Acid Groups in 414
Decomposition Through Fungal Activity ... 414
Degradation in Nitration and Denitration Processes 300
Diffraction Data: X-ray Diffraction Patterns of Cellulose Particles and Interpretation of 46
Direct Dyeing of 252
Discoloration of Materials Containing—Through Contact with Vulcanized Rubber 303
Effect of Reduced Vat Dyes on the Hypochlorite Oxidation of 305
Elasticity of 492
Electron Diffraction 414
Entering of Water in Crystal Lattice of ... 45
Ester Solutions: Filament Drawing Capacity 300
Fibres: Dimensions of Micelles of 449
X-ray Studies of Crystallite Orientation in 175
in Fibrous Raw Materials: Determination .. 535
in Schweitzer's Reagent 300

Materials: Oxidation of Cellulose and 524
Membranes: Formation and Structure of ... 246
Methods of Determining—in Bast Plants .. 536
Methylene Blue Number of 246
Microstructure of 223
Nature of 246
Oxidation of—and Cellulose Materials 524
Particles: Separation of—in Membranes of Cotton Fibres by Treatment with Hydrochloric Acid 415
X-ray Diffraction Patterns of 46
Photochemical Reaction of 223
Products: Adsorption of Organic Liquids by 246
Refractive Power of—and Its Derivatives .. 246
Structure 340
of Native Cotton 524
Celluloses and Artificial Resins: Tensile Strength 498
Cellulosic Materials: Sorption of Water Vapor .. 417
Membranes: Structure and Selective Permeability 425
Transmission of Water Vapor Through . 340
Substances: Determination of Viscosity for Characterization of 247
Chain Length and Constitution of Starch Dextrins 421
-weight Loading: Application of—to the Determination of Jell Strength 498
Chemical and Allied Literature: Searching 460
Assistants for Finishing of Woolen Fabric .. 255
Balance: Portable 396
Constitution and Color: Relation Between . 531
Costs: Recovery Process Reduces—in Soaking Rayon 250
Fibres 139
Forces from Standpoint of Quantum Mechanics 426
Methods: New—in Processing Rayon 533
Nature of Lignin 523
Technical Investigations of Problems of Dyeing and Printing 307
Technology, Dyeing and Bleaching of Jute . 181
Testing of Physical and—Properties of Wool by Means of the Microscope 228
Treatment of Wool in Preparation for Carding 417
Chemicals and Wool 455
Chemistry of Cellulose 247
of Sewage Containing Trade Wastes 427
of Silk and Silk Processing: Developments During 1934 in the 252
of Textile Water Supply. I, II 305
of Wool Washing 340
Report of Sub-committee on—of Wool 176
Chlorine: New Method of Determining Active—in Bleaching Solutions 454
Volumetric Method for Distinguishing Between Active—of Hypochlorite and Cotton Chloramines in Used Bleaching Baths 538
Chlorination of Wool. II 306
Chromate Evaluation of Rongalite 306
Chromium Mordants in Textile Dyeing and Printing 455
Cloth: Effect of Number of Warp and Filling Yarns per Inch and Some Other Elements of Construction 417
Effect of Yarn Twist on Properties of 495
Lack of Fastness of—to Rubbing 346
Radiography of 500
Shrinkage: Some Problems of 302
Water- and Rain-proof Tests 255
Clothing Fabrics: Physical Properties of 250
Properties of—Based on Physiological Standards 140
Cloths: Printing of—by Air-brush Spraying 345
Coagulation Mechanism: Viscose 415
Coatings: Effect of Protective—on the Absorption of Moisture by Gelatin-latex Gas-cell Fabrics 48
